

The background features a woman's midsection on the left, wearing a white bikini, and a close-up of a woman's face on the right, with her hands framing her face. The overall aesthetic is clean and professional, with a light blue and white color palette.

ULTRAFORMER III

Non-surgical Lifting, Tightening & Contouring System

Consultation Guide

Why ULTRAFORMER?

The Ultraformer III is a completely non-invasive, face lifting and tightening, body tightening and contouring device that provides a customized treatment procedure for the entire face, neck, and body.

Utilizing HIFU technology with Micro and Macro Focused cartridges, the Ultraformer III addresses signs of aging to restore youth and confidence of consumers around the world.

The Ultraformer III has also been approved to the standard of international regulatory bodies and associations which include Australia, Brazil, South Korea and Europe.

The Ultraformer III maintains a firm and growing presence in clinics and hospitals across more than 55 countries.

The Ultraformer Way

The Ultraformer III system is easy to incorporate into clinics and may be used in conjunction with other treatment modalities. With no downtime, anesthetics, incisions, or side effects that affect your daily routine, the Ultraformer III treatment is the perfect “lunchtime” procedure.

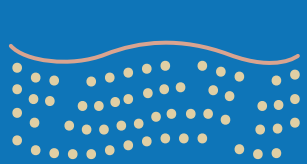

The Ultraformer III provides:

- Quick and efficient treatments
- Micro & Macro focused cartridges
- Treatments for a wide demographic
- Solutions to address signs of aging

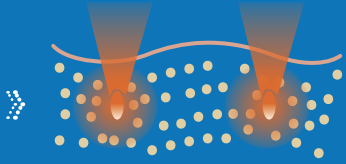

Skin Lifting for Age Shifting. Ultraformer. Ultra-focused. Ultra-quick.

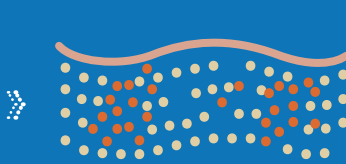

Comparable to utilizing sunlight and reflecting it through a magnifying glass to deliver a beam, Ultraformer treatment delivers ultrasound energy into the target region of the skin, stimulating and formulating collagen regeneration. The precision in delivery of a high density of power, triggers neo-collagenesis naturally within the body.

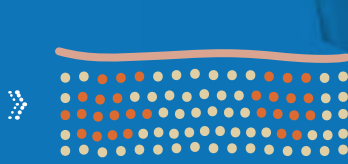

The dermis layer of the skin naturally synthesizes less collagen over the course of time.

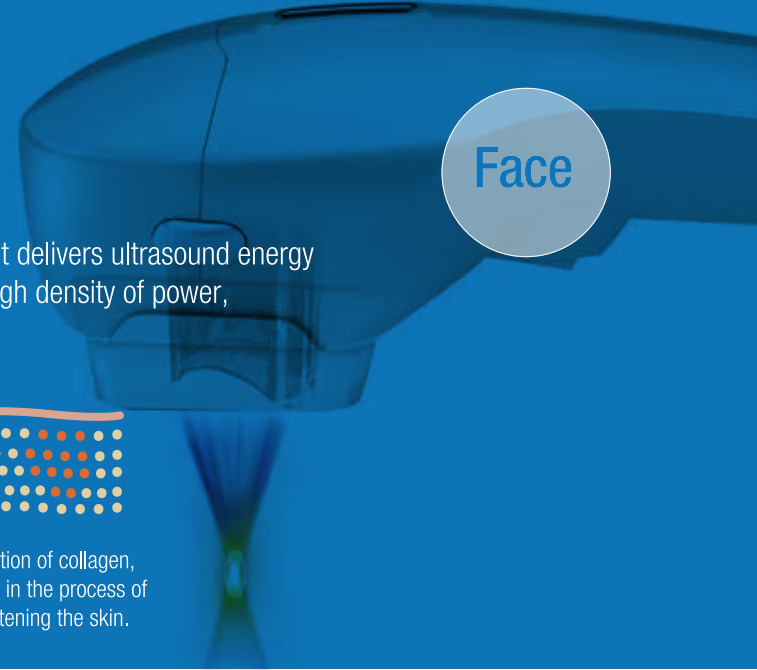

Focused ultrasound waves deliver energy directly within the skin layer causing a shrinking effect.

After inflammation and fibroplasia is caused, new collagen is formed in the targeted area.

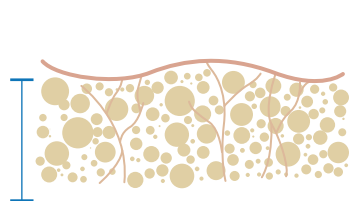

Through the regeneration of collagen, wrinkles are eliminated in the process of both firming and tightening the skin.

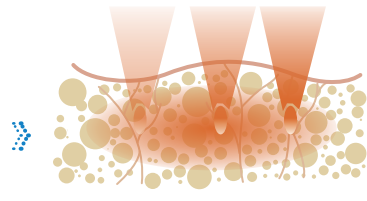

Eliminate stubborn fat cells in the easiest way possible. Non-invasive, no cutting, no stitches, no downtime.

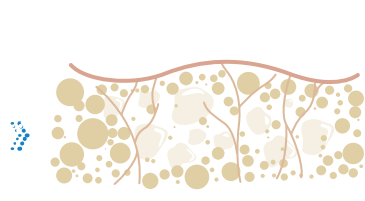

Stubborn fat cells are difficult to burn off even through strenuous exercises and extensive weight loss regimens. The Ultraformer III treatment provides both non-invasive and innovative solutions without including side effects or damage to skin.

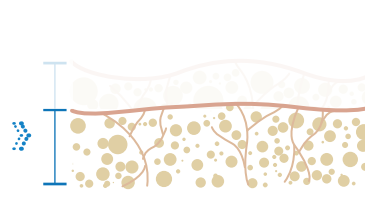

Fat cells and cellulite is formed within the body.

The Ultraformer energy destroys the fat cells that have been targeted.

As a natural healing response of the body the cells regenerate joining together to fill the gap.

In result, the layer of fat naturally exits the body delivering a smooth, contoured body line.

How does the Ultraformer III lift & tighten the face?

Multi-depth cartridges lift and tighten the face for a more youthful complexion. From the forehead down to the creases on your neck, the Ultraformer III provides the absolute solution to resolve complexes and apparent signs of aging.

How does the Ultraformer III tighten & contour the body?

The Ultraformer III provides competent tightening and contouring procedures to address loose skin and contouring needs of the body. Multiple cartridges at various depths are utilized to target multiple layers of the skin to enhance skin elasticity quickly and efficiently.

Before treatment

- Consult with your doctor or professionals to assess whether you are suitable for treatment
- Consult with your doctor if currently taking medication
- If you have prior treatment within the desired application area consult with professionals

e.g treatment area- filler, botulinum toxin, other laser procedures

ON THE DAY of treatment

Face

- Wear comfortable clothing
- Remove make up
- Face application treatment length is approximately 20-30 minutes
- Face application treatment length varies on the area

ON THE DAY of treatment

Body

- Wear comfortable clothing
- Body application treatment length is approximately 30-40 minutes
- Body application treatment length varies on the area

After treatment

- No downtime necessary
- You may apply makeup following treatment
- The treated area may appear slightly red or pink. This will resolve within a few hours post treatment.
- There are no post-procedure limitations on activity.

Ultraformer Treatment.
A lunchtime procedure.

Clinical Cases

| Wrinkle Reduction & Cheek Lifting

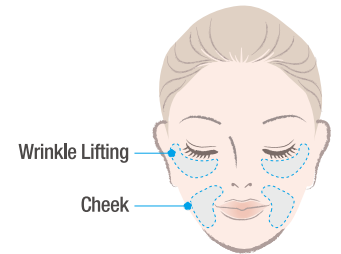

Baseline

Immediately Post Procedure

Procedure Information

Patient info Female / 31

Application

Result

Wrinkles visibly smoothed out, effective immediately after procedure.

Patient Comment

Clinical Cases

| Axilla

Baseline

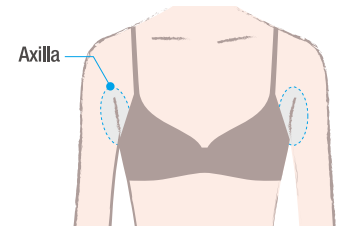

Immediately Post Procedure

Procedure Information

Patient info Female / 30

Application

Result

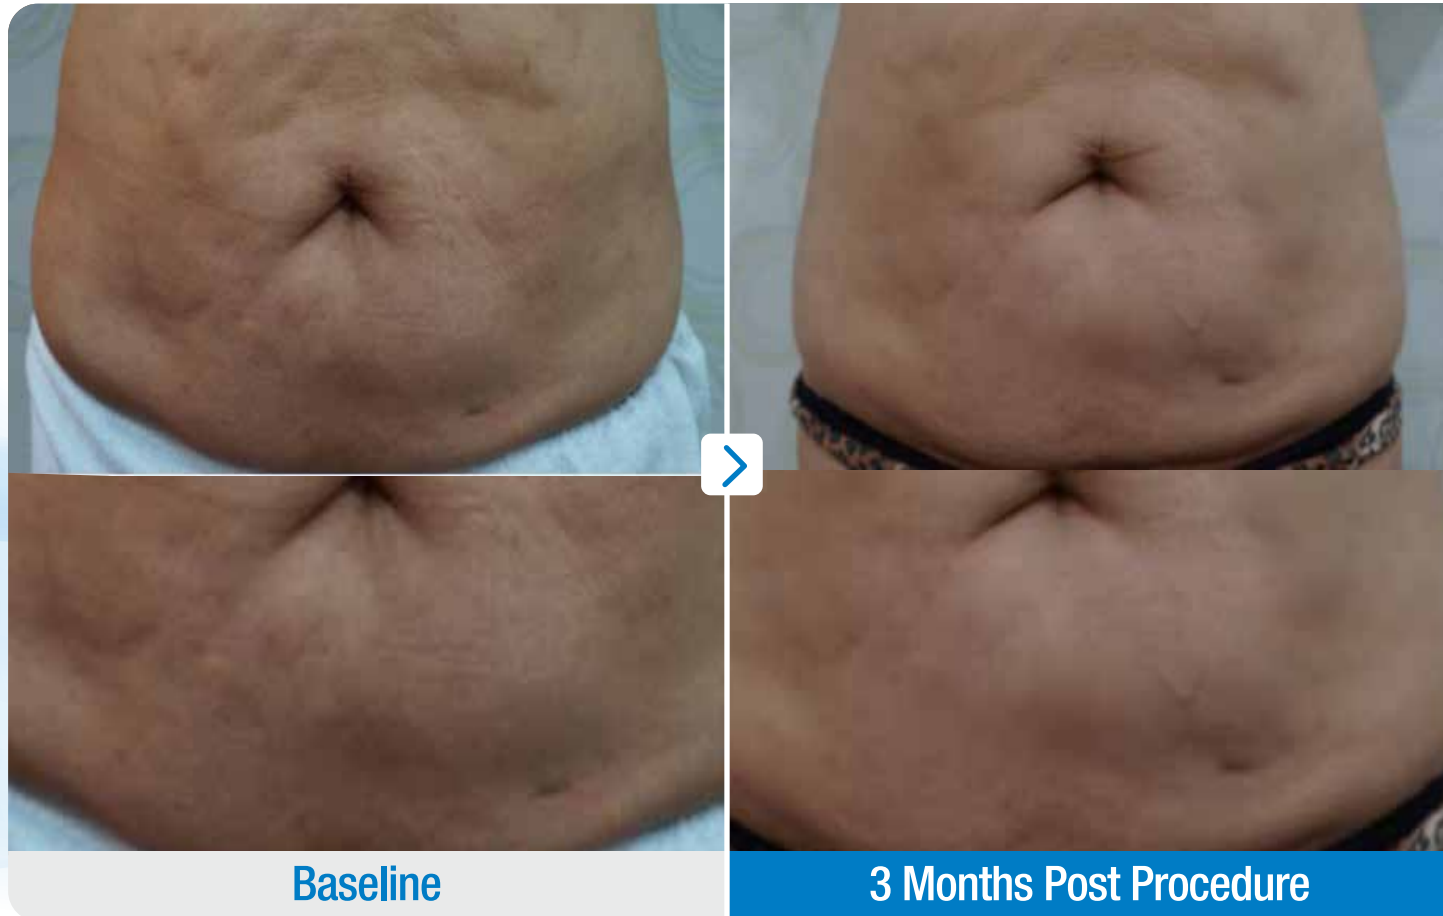

Overlap of fat is not visible.
Good outcome.

Patient Comment

I can't believe the changes
that I'm seeing.
My rolls are not visible already?
The Ultraformer does not disappoint.

Clinical Cases

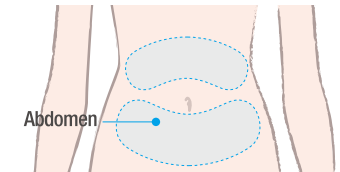

| Abdomen

Procedure Information

Patient info Female / 53

Application

Result

Reduction of sagging skin.
General lifting of sagging skin.
Post 3 months of procedure.

Patient Comment

I didn't know the length and efficacy of results but after three months the results are outstanding.

FAQ

“Uncovering your grin from deep within”

What are the advantages of the Ultraformer III?

The Ultraformer III utilizes cartridges focused on multiple depths of skin for lifting and tightening the face as well as tightening body tissues for contouring purposes. The patient can receive customized treatments on the face and body with the stable delivery of ultrasound energy, fast application, and precise accuracy of MMFU-powered transducers.

How is fat naturally removed from the body by the Ultraformer III?

Macro-focused depth cartridges damage fat cell membranes consisting of triglycerides and are then transported through the vascular and lymphatic systems to the liver. This process is made possible through the body's natural metabolism as the liver makes no distinction between fat disposed of by the Ultraformer III and fat originating from food consumption.

Are there any side effects?

Although both desired and competitive results for facial lifting and tightening and body contouring will likely show over the course of 3 months after receiving treatment, patients may still experience slight redness for a few hours as well as swelling or tingling in either treatment area of focus for up to a few weeks. There may also be bruising and numbness on treated areas but should resolve 2-4 weeks following procedure.

FAQ

Is there any pain during treatment?

The Ultraformer III delivers comfortable procedures with its uniquely-designed transducer system developed only by CLASSYS. Many patients and practitioners report that the Ultraformer III, in comparison with other devices, delivers minimal pain with slight discomfort to the face or body, though sensations quickly subside immediately following treatment.

Am I a candidate for the ULTRAFORMER III?

Patients with diverse skin conditions such as fine lines, wrinkles, and hyperpigmentation on the face, or stubborn belly fat and love handles desiring a more curvaceous body figure, serve as ideal candidates for the Ultraformer III. Practitioners can also accommodate both face and body profiles with a variety of multi-depth cartridges that cater to a larger demographic of candidates.

How long do the results last?

Patients may notice immediate results with progressive improvement up to 90 days post-treatment. These results can be maintained from several months to a year afterwards.
